

myMetco™

Instant Access to Advanced Materials
and Spare Parts

Your One Stop Online Powerhouse

Offered 24/7

For more than 85 years, we have collaborated with our customers to bring them the best products for coatings and other advanced industrial processes. Through our investment in research and development, as well as in-house flexible manufacturing processes, we have solved challenges for our customers across a wide variety of essential industries. Today we hold numerous quality system certifications and OEM material approvals for aerospace, power generation, oil and gas and more.

myMetco™ is an online ordering platform to explore our most popular materials and spare parts in our portfolio. Now online, you can enjoy a seamless ordering experience and greater efficiencies.

**optimize
performance
and efficiency
today**

**A superior
user experience**

- A diverse selection of materials, for thermal spray, additive manufacturing and other processes you use
- Our most requested spare parts for our thermal spray guns and components
- Current product pricing and availability, provides transparency for you to make informed choices
- Strong search and compare capabilities, enable you to find the right material for your application requirements
- Free access to expert product technical support, lets us help you solve your surface challenges
- Easy access to invoices and delivery tracking, for greater convenience
- Quick order, saves you more time

About Oerlikon Surface Solutions Division

Oerlikon is a leading global provider of surface and additive manufacturing solutions and services. The division offers an extensive portfolio of market-leading thin-film, thermal spray and additive manufacturing technologies, equipment, components and materials. Emission reduction in transportation, maximized longevity and performance of tools and components, increased efficiency and intelligent materials are hallmarks of its leadership. Pioneering technology for decades, the division serves customers with standardized and customized solutions across a worldwide network of more than 170 sites in 37 countries. With its technology brands – Oerlikon Balzers, Oerlikon Metco and Oerlikon AM – Oerlikon's Surface Solutions division focuses on technologies and services that improve and maximize performance, function, design, reliability and sustainability, which are innovative, game-changing advantages for customers in the automotive, aviation, tooling, general industries, luxury, medical, semiconductors, power generation and oil & gas markets. The division is part of the publicly listed Oerlikon Group, headquartered in Switzerland, which has 12 000 employees and generated CHF 2.65 billion in revenue in 2021. Information is subject to change without prior notice.
