Oerlikon Neumag at the ITMA ASIA + CITME 2014

China – BCF market with a future

Neumünster/Shanghai, June 16, 2014 – At this year's ITMA Asia from 16 – 20 June, Oerlikon Neumag will be presenting their solutions for an efficient carpet production. In hall W3, booth F01, the focus of the information will be on the 3-end BCF plant S+.

The Asian market is still regarded as a small market with development potential due to its classical consumer behavior on the carpet sector, especially for export. The market is very much focused on the production of contractual goods. There seems to be a change coming. „Our customers are always looking for innovations and new products“, explains Alfred Czaplinski, Sales Manager BCF. „Due to the high flexibility of our S+, we can practically cover every application“.

Oerlikon Neumag focusses on the S+

The 3-end S+ not only convinces due to the efficiency of 99% and therefore raw material cost savings. It also covers a wide spectrum of producible total titers of 600 – 4000 dtex. Furthermore, all polymers from polyester, via polypropylene up to polyamide 6, can be processed on the multipolymer plants without conversions.

Since its introduction to the market in 2011, the S+ is the most-sold BCF plant and produces economical, high-quality BCF yarns worldwide.

About Oerlikon

Oerlikon (SIX: OERL) is a leading high-tech industrial group specializing in machine and plant engineering. The Company is a provider of innovative industrial solutions and cutting-edge technologies for manmade fibers manufacturing, drive systems, vacuum, surface solutions and advanced nanotechnology. A Swiss company with a tradition going back over 100 years, Oerlikon is a global player with around 15 500 employees at over 170 locations in 35 countries and pro-forma sales of CHF 3.6 billion in 2013. The Company invested in 2013 CHF 146 million in R&D (pro-forma), with over 1 200 specialists working on future products and services. In most areas, the operative businesses rank either first or second in their respective global markets.

About Oerlikon Manmade Fibers

Oerlikon Manmade Fibers with the product brands Oerlikon Barmag and Oerlikon Neumag is the world market leader for filament spinning systems used for manufacturing manmade fibers, texturing machines, BCF systems, staple fiber spinning systems and artificial turf systems and – as an engineering services provider – offers solutions along the entire textile value added chain. As a future oriented company, the Oerlikon Group segment's research and development is driven by energy-efficiency and sustainable technologies. With the expansion of the product range to include polycondensation systems and their key components, the company now caters to the entire process – from the monomer all the way through to the textured yarn. The primary Oerlikon Barmag markets are in Asia, with Oerlikon Neumag's main markets in the US, Turkey and China. Correspondingly, the companies – with almost 2 500 employees – have a worldwide presence in 120 countries as part of the Oerlikon Manmade Fibers network of production, sales and distribution and service organizations. At the R&D centers in Remscheid, Neumünster and Chemnitz, highly-qualified engineers and technicians develop innovative and technologically-leading products for tomorrow's world.
